EXPERIENCE

MrMed

Dec. 2025 – Present

Product Design Intern

- **Ecosystem Redesign:** Led UI/UX overhaul for web, mobile, and admin dashboards, consolidating legacy interfaces into a unified design system.
- **Feature Prototyping:** Translated complex requirements into high-fidelity prototypes, optimizing cross-platform user flows and functional parity.
- **System Efficiency:** Developed a scalable component library, streamlining developer handoff and reducing production cycles.

Real Dev Squads

Aug. 2025 – Dec. 2025

UI UX Intern

- **Redesigned** the RDS Status internal tool, using Figma prototypes to eliminate usability flaws and streamline administrative workflows.
- **Developed responsive UI** components (profile settings and notification systems) to standardize the interface of the public-facing Stride app.
- **Executed targeted user research** for SkillTree, identifying core user pain points to inform the app's initial design phase.

Preppal

June 2025 – Present

Co-Founder

- **User Validation:** Spearheaded initial product validation by designing and distributing a quantitative survey to 70+ target users, identifying information overload as the primary barrier to entry.
- **Data-Driven Design:** Translated survey insights into a minimum viable product (MVP), ensuring core features directly addressed the top three user-reported needs.

PROJECTS

Pockets

- **Conceptualized** and launched a goal-based personal finance platform, enabling users to dynamically allocate general funds into custom "pockets" to improve financial tracking and visibility.
- Architected a **"spillover"** transaction engine that automatically reroutes payments to a master account when a specific pocket is depleted, eliminating user friction and preventing declined transactions.

VOLUNTEERING

Girls Leading Tech

- **Community-Centric Leadership:** Organized 30+ virtual tech events and hackathons fostering a collaborative community spirit, while leading and mentoring the design team; custom-designed the community logo and branding.

EDUCATION

SRM Institute of Science and Technology

Bachelor of Computer Applications in Data Science

Jan 2024 – Dec 2026

- * **Coursework and Skills:** Data Structures, Algorithms, Databases, Machine Learning, Artificial Intelligence, AI Tools, Python, React, JavaScript, Design Tools, Communication and Leadership, Design Thinking, Product Innovation
